California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Mike Gallardo

Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Michael Viernes

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

I am completely disgusted with the way in which this process has been imposed upon those who contribute so much to the economy of California. I vote, my wife votes, my kids vote, and my friends vote. We will CERTAINLY be watching and voting accordingly.....

Sincerely,

Mike Reese

Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Bill Turner

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler and father of two sons I'm introducing to the joys of the outdoors, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources and to pass along a great tradition of stewardship to our next generation. It is therefore important that we are given enough time to review and weigh in on the process.

Eliminating the opportunity for families to fish shouldn't be taken lightly. A 45-day extension seems entirely reasonable.

Sincerely,

Scott Sorensen

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Dale Myer

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, surfer, diver & father, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

As part of this extension, I believe it is in all of our best interest to have unbiased scientific evidence, representing the many aspects of fish populations, annual behaviors/locations used to determine fish stocks, climate patterns, etc..., presented. I did attend a number of the open forum MLPA discussions and heard plenty of emotional responses (from all points of view) but minimal scientific fact to back up opinions.

You have a great weight presented to you to both preserve our oceans and yet let the people of California (and our visitors) enjoy that same ocean and this is no easy task.

I trust you will execute with due diligence in determining the future of our ocean's resources and preserving our ability to enjoy them.

Sincerely,

Ed Smith

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Juan Rubalcava

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

I have over 60 days of fishing saltwater so far this year. Fishing means more than a lot to me. I request that you extend the review time of the DEIR to at least 90 days. Given the debacle of a process that this round has become, it would behoove you to study and choose wisely.

Conservation, not closures, is what will save fish. Lower the allowable fish counts.

Sincerely,

Chad Gangnath

Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

(KEEP AMERICA FISHING PLEASE!)

Sincerely,

Simon

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As a resident of San Clemente and a business owner in Dana Point , this ACT will severely change the economic makeup of our community. Please read a letter about a kids fishing trip that took place in front of Laguna Beach which is a short 20 minute boat ride from Dana Point, as you will read these kids were not making an impact on the resource and how can you try to stop them. The bellow letter is from the Orange County Register today by David Whiting. We are at sea a few miles off the coast of Orange County, courtesy of something called Fish For Life. And Wallace is busy joking with everyone aboard the Dana Pride. Wallace high-fives guys helping bait hooks. Then he whips back his hand at the last second. "Oh, snap," he laughs. He grabs a live anchovy and waves it near a young woman photographing the event made possible by community coming together. "Gotcha," he giggles. Five-foot-one with hair the color of beach sand, Wallace wraps his arms around my waist. "Dave dude." The look on the volunteers' faces mirrors Wallace's own grin. The photographer flashes a mouthful of teeth her smile is so big. I have no idea what I look like. But the happiness is powerful enough to ensure the memory will last forever. Want to return the joy? Just ask Wallace his age. "Twenty. My birthday was August," he points out, delighted with crossing the landmark. Things that some of us might take for granted, Wallace celebrates. And that is his secret. Wallace and I agree that by being happy, you can spread happiness. And when you're sad or angry? Wallace advises just go for a walk and you'll feel better. ••• I met Wallace a few years ago

through my wife, an aide in special education with the Capistrano Unified School District. Wallace and I went hiking together and immediately hit it off. We discovered that we shared a common gene that makes us competitive. Wallace - literally - skipped down the trail. "I'm the best hiker," he said when I caught up. That was when he first told me about angels. "The angels give me powers." But angels sounded more like "dangers." Wallace has Down syndrome and it affects his speech. Understanding Wallace is not a problem, however. It just takes a little patience for both of us. I keep asking and he keeps answering until I get it right. A few weeks ago, I called Wallace. Did he want to go ocean fishing? Wallace instantly agreed. It would be his first time fishing. My friend is cared for by his single mother and grandmother. I let them know that everything - rod, reel, bait, food and boat - would be provided by Fish for Life, a nonprofit outfit started this year by San Clemente resident Jim Holden. The goal is a series of fishing trips for young people with special needs or other challenges. ••• As I drive south from Wallace's home in Lake Forest, we swap stories. I remind him when my wife, "Miss Sue," took him to the high school prom. Wallace danced non-stop. He tells me his favorite video game is Dragon Ball Z. With the Dana Pride's engines idling, I remove my cap during the Star Spangled Banner and place it over my heart. Wallace looks up and puts his hat over his heart. We smile. An early morning coastal fog wraps us in a blanket of cool moist air and Wallace shivers. But he shakes it off as we head out. Still in the Dana Point Harbor, the boat stops for a few minutes. To starboard, a fireboat shoots geysers celebrating the outing. On the port side, a bait boat loads the Dana Pride with bits of squid and live anchovies. Wallace cracks up holding a wiggling anchovy. As he plops it back in a tank, for a nanosecond - just a nanosecond mind you - the anchovy appears to crack up too. We drop anchor near the kelp beds off Salt Creek beach. The cliffs of the Dana Point headlands rise to the southeast. Inlets march northwest toward Laguna Beach. The coastal hills rise before us. As the sun breaks through the mist, the ridgelines glow. Volunteer Brian Coughlin of San Juan Capistrano, an expert fisherman and free diver, shows Wallace how to work the reel, a complex-looking contraption with locks and buttons and a lever that turns with the precision of a Porsche. Wallace masters the device. Coughlin baits the line and Wallace and I peer over the varnished wood rail. We watch our anchovy friend disappear into the green-blue depths. There's a tug on the line. Wallace spins the reel. A mackerel pops up out of the water, performing backflips on the line. "Help me," Wallace shouts with glee. I grab the slimy creature. Its underbelly spike digs into my hand and I stuff it in Wallace's burlap catch bag. Coughlin races back for more bait. He returns, loading hooks, juggling rods and helping other new anglers unravel the mysteries that make a fisherman. "Help me!" Wallace shouts again. This time I grab a pair of pliers and hold the mackerel closer to its head. Wallace notices a young woman nearby is catching more fish. He stares grimly at his line. "Come on fish." A large mackerel slips off his hook as Wallace raises the rod. "We know where he is now," Coughlin says

pointing to the sea. "He's right down there." Wallace eyes him narrowly. But before he has a chance to respond, he has another mackerel. Then another and another. ••• As we climb into my car. Wallace holds a bag of fish in one hand and a trophy in the other. "Top Angler" it states, as do 20 other trophies held tightly or resting in packs strapped to wheelchairs. In the excitement on the way home, I nearly miss seeing a red light. But Wallace spots it. "I'm good at driving," Wallace tells me, beaming. "What makes you so good?" I ask. "Angels."

In closing I ,As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Thanks Donna Kalez

Sincerely,

Donna Kalez

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Jerod Harris

Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

There are so many reasons not to implement these MLPAs it goes beyond understanding why the process continues to be an issue.

The economy in CA is horrible. Unemployment is very high with no sign of dropping any time soon. These MLPAs will have an extreme effect on all people who make a living off the sport fishing industry. Why purposely add more people to the numbers of jobs lost? Tax dollars will be lost as sales associated with fishing drop off dramatically. The state needs those sales taxes and income taxes to continue to operate.

There is not any state money to fund the requirements of the bill as written. Using "private" money to fund the program creates a horrible conflict of interest as the people who are providing the money are the same people who want the most restrictive plan. There is no way that the process can be implemented with that money and not be tarnished with favoritism.

Please look at reducing the take limits and size limits for fish that remain in our area for their whole life span (non-migratory fish) as an alternative to these MLPAs. It will accomplish the same thing and not

tromp on your citizens rights to fish as they choose.

Extend the study and then please try to keep an open mind to the rights of those who work and play in our state.

Sincerely,

Robert T. MacHale

Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

donna granucci

September 26, 2010

California Fish and Game Commission
1416 Ninth Street P.O. Box 944209
Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Mike Malm

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Not only does the MLPA impact the rights of Angers, it significantly changes how all Californians access and enjoy our coastline and waters.

A review period is not only warranted, it is necessary to ensure that the right to Californias resources is protected for all.

Sincerely,

Leonard Buchholz

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

Because of the complexities I am asking that stakeholders and the community be given time to review the DEIR. The changes made will have an impact on California's anglers for generations to come. Allow us the opportunity to get this right.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Regards,

Edward Ramirez

Sacramento, CA 94244-2090

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Governmental agencies routinely take well in excess of 90 days and sometimes over a year to review EIR for private industry projects.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

Kenneth Cecil

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary. As a voting and taxpaying resident of the State of California, I simply do not care about any deadlines contained within any MOU's that the state has signed with private foundations or the current (lame duck) governor's desire to create an "enduring legacy" for himself by ramming "Marine Protected Areas" down the throats of the California public.

Do not the people of California deserve the same opportunity to thoughtfully and thoroughly review and comment on state generated Environmental Impact Reports?

Sincerely,

Daniel E. Seitz

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

As an avid angler, the Marine Life Protection Act (MLPA) will have significant effects on my ability to enjoy California's ocean resources, and it is therefore important that I am given enough time to review and weigh in on the process.

Given the complexity, importance, and sheer magnitude of the DEIR, a 90-day review and comment period is not only warranted, but necessary.

Sincerely,

JOSEPH BOW

To: "FGC" <FGC@fgc.ca.gov>

To whom it may concern-

I am sending this e-mail as a concerned sports fisherman to request that a 45 day extension to review and comment on the DEIR be granted. I as a tax paying citizen of the State of California I am not happy with how the MLPA process has been funded or conducted. I have seen nothing that convinces me that the State of California can afford to police or enforce the proposed MPA's once they are in place and that we tax payers will not have to pay even more higher taxes to fund this boondoggle.

Thank You,

Nick Ekdahl

To whom it may concern,

My name is John Hughes and I am a spearfisherman from San Pedro. I've been following and participating in the MLPA process for the last few years. I spend more time than most in the water as it is my main source of recreation and relaxation from an extremely busy life filled with work and family. I spend alot of time and money in the pursuit of my recreation, most of it spent right here in California. I vote.

Please, please! extend the comment period for the DEIR document as it is a huge document and having limited time it's almost impossible to digest it and have time to formulate a reasonable response.

I appreciate your consideration of the matter.

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

My first Marlin was caught off that coast. It was an amazing experience and I'll never forget a single minute of it. Right now the waters are closed to fishing. Not sure why. Not sure what the data was that prompted it. Not sure that they'll ever open again. Certainly doesn't appear that they will ever be opened again. It's an awful, awful shame that my right of using a public resource was unilaterally taken away, with no science and no plan to affect the resources in any sort of organized fashion. It is a basic courtesy to engage in transparent public decisions that are based on clean scientific data, with ample time for public input when dealing with public resources. Please be sure to allow ample time to review pertinent documents prior to making public decisions. Please allow at least 90 days for ample public review of the DEIR. Anything less would be simply usurping the public's right to know and understand.

Sincerely,

Jeff Kolodzinski

To Whom it may concern,

As an active outdoors family who spends thousands of dollars every year on ocean related activities, we see the South Coast MLPA process as drastically impacting our communities lifestyle and have great concerns over the large areas of the ocean that will be likely closed forever. As such, it deserves a very careful study.

The DEIR is a long complex document that needs to be reviewed in detail. We need time to review and form comments in response to this important document.

We would like to request to extend the review period on the South Coast Region Environmental Report(DEIR) from 45 to 90 days.

Thank you for your time,

Re: Request to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days

Dear Sirs:

I am a spearfisherman, fisherman, kayaker and diver and spend approximately 100 days per year on the ocean.

The South Coast MLPA process materially impacts my recreational opportunities and my ability to enjoy the ocean. It also closes parts of the ocean for years to come. As such it deserves careful study as it may be in violation of Article 1, Section 25 of the California Constitution.

Further, the DEIR is a complex 548-page document that is a very important part of this process. I need time to review and formulate comments in response to this complex document.

Accordingly, I respectfully request to extend the review and comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

Dear California Fish and Game Commission:

I am writing to urge you to extend the comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days.

I am an avid angler and conservationist. That may seem like a contradiction, but it really isn't. The ocean and its bounty are very precious resources which must be handled responsibly. This has not been done very well in the past, but the measures being proposed by the MLPA take things too far. I love fishing, but what I love more is the way that fishing can be used to bring people together. Taking away access to local fishing would be terrible for the youth of today and the future, as they would be missing out on a positive alternative to all the negative influences out there today. I think many others feel as I do, so I respectfully ask that you extend the review period to 90 days for my fellow ocean lovers to really put in their two sense on this very important issue.

Sincerely,

Albert Shin

To: "FGC" <FGC@fgc.ca.gov>

Dear F&G:

I am writing to request South Coast Study Region Draft Environmental Impact
Report comment period be extended to 90 days.

The DEIR is a huge complicated document and I need more time to wade through
it and prepare my comments. As a recreational diver, boater, and
spearfisherman the size and location of MLPA closures directly impacts me.
I have a boat berthed in Santa Barbara Harbor and belong to the L.A.
Fathomiers Spearfishing Club. I routinely dive and fish in the areas under
consideration.

Extending the comment period from 45 to 90 days will give myself and
everyone else adequate time. For something so important it's best to take
the time to do it right.

Thanks,

Ben Wolfe III

Mr. Jim Kellogg, President
California Fish & Game Commission

Re: Support to (1) Extend, for 90 days, Review and Comment Period DEIR –
South Coast MLPA and (2) Proposal 2 for South Coast MLPA

Dear President Kellogg:

I am a very long standing member of the Los Angeles Rod and Reel Club
and a very passionate and frequent salt water fisherman in the South Coast Area.

FLD-1

The purposes of this letter are to support (1) a minimum ninety (90) day
period to extend the review and comment period for the South Coast DEIR and
(2) Proposal 2 for approval and passage by the Commission for the South Coast
MLPA.

FLD-2

There has never been, and may never be, a more important decision to be
made by the Commission that affects so many fishermen, both recreational and
commercial, and their supporting industries that bring literally billions of dollars
of revenue and taxes into our state.

FLD-3

I know, from listening to the members of our environmental committee,
specifically Eric Rogger, John Ballotti and Merit McCrea, that the current draft
report overlooks and does not address significant major issues in regard to the
short and long term effects of the proposed MLPA for the South Coast

FLD-4

Certainly such ninety (90) day extension is an insignificant period to grant for such review and comment given the enormous effect on the result for many years to come. There is clearly precedent to such extensions being granted such as the same extension granted for review and comment of the Channel Islands MLPA'S

FLD-1

The members of our club alone fish over 150 days a year mostly within the jurisdiction of the MLPA in the South Coast mainly targeting Calico Bass, Yellowtail, White Sea Bass and rockfish. All of these species will be affected by the South Coast MLPA.

FLD-5

In Closing, I request the Commission to both (1) grant such 90 day extension and (2) approval Proposal 2.

Very truly yours,

Stephen J. Simon

SOUTH COAST MARINE PROTECTED AREAS PROJECT FINAL ENVIRONMENTAL IMPACT REPORT

Responses to Form Letter D

Response to Comment FLD-1: Comment noted. See text provided in the preamble of this section on the 15-day extension that was granted by the Commission. *No changes to the Draft EIR are required.*

Response to Comment FLD-2: The purpose of the EIR is to assess the potential direct and indirect adverse physical environmental impacts from implementation of the proposed Project IPA or alternatives and to identify avoidance or mitigation measures that would reduce adverse environmental impacts. Because the comment does not alter the impact analysis in the Draft EIR, no change to the Draft EIR is warranted. *No changes to the Draft EIR are required.*

Response to Comment FLD-3: Comment noted. *No changes to the Draft EIR are required.*

Response to Comment FLD-4: The commenter does not provide evidence supporting the assertion that the report fails to address CEQA-required topics. Therefore, *no changes to the Draft EIR are required.*

Response to Comment FLD-5: Comment noted. The information provided does not alter the impact analysis in the Draft EIR. *No changes to the Draft EIR are required.*

**Mr. Jim Kellogg, President
California Fish & Game Commission**

**Re: Support to (1) Extend, for 90 days, Review and Comment Period DEIR –
South Coast MLPA and (2) Proposal 2 for South Coast MLPA**

Dear President Kellogg:

**I am a member of the Los Angeles Rod and Reel Club. My children and I
fish in the areas that now are proposed to be effected by the MPLA.**

**The purposes of this letter are to support (1) a minimum ninety (90) day
period to extend the review and comment period for the South Coast DEIR and
(2) Proposal 2 for approval and passage by the Commission for the South Coast
MLPA.**

**There has never been, and may never be, a more important decision to be
made by the Commission that affects so many fishermen, both recreational and
commercial, and their supporting industries that bring literally billions of dollars
of revenue and taxes into our state.**

**I know, from listening to the members of our environmental committee,
specifically Eric Rogger, John Ballotti and Merit McCrea, that the current draft
report overlooks and does not address significant major issues in regard to the
short and long term effects of the proposed MLPA for the South Coast**

Certainly such ninety (90) day extension is an insignificant period to grant for such review and comment given the enormous effect on the result for many years to come. There is clearly precedent to such extensions being granted such as the same extension granted for review and comment of the Channel Islands MLPA'S

The members of our club alone fish over 150 days a year mostly within the jurisdiction of the MLPA in the South Coast mainly targeting Calico Bass, Yellowtail, White Sea Bass and rockfish. All of these species will be affected by the South Coast MLPA.

In Closing, I request the Commission to both (1) grant such 90 day extension and (2) approval Proposal 2.

Very truly yours,

STEPHEN A. DIGIUSEPPE

Form Letter E1

September 27, 2010

Mr. Jim Kellogg, President
California Fish and Game Commission
1416 9th Street, 13th Floor
Sacramento, CA 95814

Dear President Kellogg:

As a member of California's sportfishing industry, I appreciate the opportunity to provide input on the Marine Life Protection Act (MLPA) implementation process, as it could potentially have significant effects on the future of my business. As such, I believe it is very important that the MLPA process be carried out thoughtfully with due consideration and input from stakeholders, the public and affected businesses.

E1-1

I am therefore writing to urge the California Fish and Game Commission (FGC) to extend the review and comment period on the South Coast Study Region Draft Environmental Impact Report (DEIR) from 45 days to 90 days. This 548-page document is exceedingly complex, and it raises a host of issues that require careful consideration. It is imperative that the FGC allow a longer, 90 day period to provide the public with sufficient time to review and comment on this massive report. A 90 day comment period would be consistent with the review and comment process for the Channel Islands National Marine Sanctuary Draft Environment Document, for which the FGC granted an extension from 45 days to 93 days.

E1-2

Given the complexity, importance, and sheer magnitude of the DEIR, a 90 day review and comment period is warranted for this document. The public deserves enough time to carefully review and provide input on the DEIR to ensure it is as comprehensive, informative and accurate as possible. The MLPA is too important to rush through in order to meet arbitrary deadlines.

I again urge you to repeat previous FGC direction and grant an extension on the DEIR public comment period. Thank you for your time and consideration.

Sincerely,

Dave Elm

Chairman, United Anglers of Southern California

SOUTH COAST MARINE PROTECTED AREAS PROJECT FINAL ENVIRONMENTAL IMPACT REPORT

Responses to Form Letter E

Response to Comment FLE-1: Comment noted. The Commission has granted due consideration and input from stakeholders and the general public, including affected businesses. See Section 2.0 of the EIR for further information on the intensive public, stakeholder, and agency-driven process leading up to the development of MPA proposals in the SCSR. *No changes to the Draft EIR are required.*

Response to Comment FLD-E: Comment noted. See text provided in the preamble of this section on the 15-day extension that was granted by the Commission. *No changes to the Draft EIR are required.*

Submitted via E-Mail: fgc@fgc.ca.gov

September 25, 2010

Mr. Jim Kellogg, President
 Mr. Jon K, Fischer, Acting Executive Director
 Members of the California Fish & Game Commission
 1416 Ninth Street
 Sacramento, CA 95814

Re: September 29, 2010 Meeting Item 1 - Support and Request that the Commission adopt a MINIMUM 90-day extension of public review and comment Period for the DEIR for the -MLPA South Coast Region.

Dear Mr. Kellogg, Mr. Fischer and Members of the Commission:

I am a very long standing member of the Los Angeles Rod and Reel Club (LARRC) and have been a very passionate and frequent salt water fisherman in the South Coast Area for many years.

The purpose of this letter is to support a minimum ninety (90) day period to extend the review and comment period for the South Coast DEIR. FLF-1

There has never been, and may never be, a more important decision to be made by the Commission that affects so many fishermen, both recreational and commercial, and their supporting industries that bring literally billions of dollars of revenue and taxes into our state.

I know, from listening to the members of the environmental committee of LARRC, specifically Eric Rogger, John Ballotti and Merit McCrea, that the current draft report overlooks and does not address significant major issues in regard to the short and long term effects of the proposed MLPA for the South Coast. FLF-2

Certainly such ninety (90) day extension is an insignificant period to grant for such additional review and comment given the enormous effect on the result for many years to come. There is clearly precedent to such extension being granted since a 90 day extension was granted for review and comment of the Channel Islands National Marine Sanctuary MPAs (CINMS MPAs). FLF-1

The members of our club alone each fish over 150 days a year mostly within the jurisdiction of the MLPA in the South Coast mainly targeting Calico Bass, Yellowtail, White Sea Bass and rockfish. All of these species will be dramatically affected by the South Coast MLPA. FLF-3

In Closing, I request the Commission grant such 90 day extension for review and comment on the DEIR South Coast MLPA.

Very truly yours,

Troy Varenchik

Certainly such ninety (90) day extension is an insignificant period to grant for such additional review and comment given the enormous effect on the result for many years to come. There is clearly precedent to such extension being granted since a 90 day extension was granted for review and comment of the Channel Islands National Marine Sanctuary MPAs (CINMS MPAs).

The members of our club alone each fish over 150 days a year mostly within the jurisdiction of the MLPA in the South Coast mainly targeting Calico Bass, Yellowtail, White Sea Bass and rockfish. All of these species will be dramatically affected by the South Coast MLPA.

In Closing, I request the Commission grant such 90 day extension for review and comment on the DEIR South Coast MLPA.

Very truly yours,

Re: September 29, 2010 Meeting Item 1 - Support and Request that the Commission adopt a MINIMUM 90-day extension of public review and comment Period for the DEIR for the -MLPA South Coast Region.

Dear Mr. Kellogg, Mr. Fischer and Members of the Commission:

I am a very long standing member of the Los Angeles Rod and Reel Club (LARRC) and have been a very passionate and frequent salt water fisherman in the South Coast Area for many years.

The purpose of this letter is to support a minimum ninety (90) day period to extend the review and comment period for the South Coast DEIR.

There has never been, and may never be, a more important decision to be made by the Commission that affects so many fishermen, both recreational and commercial, and their supporting industries that bring literally billions of dollars of revenue and taxes into our state.

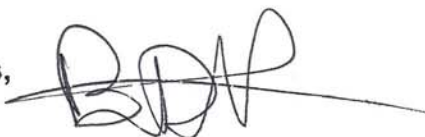

I know, from listening to the members of the environmental committee of LARRC, specifically Eric Rogger, John Ballotti and Merit McCrea, that the current draft report overlooks and does not address significant major issues in regard to the short and long term effects of the proposed MLPA for the South Coast.

Certainly such ninety (90) day extension is an insignificant period to grant for such additional review and comment given the enormous effect on the result for many years to come. There is clearly precedent to such extension being granted since a 90 day extension was granted for review and comment of the Channel Islands National Marine Sanctuary MPAs (CINMS MPAs).

There has never been, and may never be, a more important decision to be made by the Commission that affects so many fishermen, both recreational and commercial, and their supporting industries that bring literally billions of dollars of revenue and taxes into our state.

I know, from listening to the members of the environmental committee of LARRC, specifically Eric Rogger, John Ballotti and Merit McCrea, that the current draft report overlooks and does not address significant major issues in regard to the short and long term effects of the proposed MLPA for the South Coast.

Certainly such ninety (90) day extension is an insignificant period to grant for such additional review and comment given the enormous effect on the result for many years to come. There is clearly precedent to such extension being granted since a 90 day extension was granted for review and comment of the Channel Islands National Marine Sanctuary MPAs (CINMS MPAs).

The members of our club alone each fish over 150 days a year mostly within the jurisdiction of the MLPA in the South Coast mainly targeting Calico Bass, Yellowtail, White Sea Bass and rockfish. All of these species will be dramatically affected by the South Coast MLPA.

In Closing, I request the Commission grant such 90 day extension for review and comment on the DEIR South Coast MLPA.

Very truly yours,

Robert K Selwin
